Site - TM-C-198 Visited 8-9 March, 1954.

Visited March 8-9, 1954 by P. W. Grant.

Location - Fields about Old Spanish Mission at Los Angeles, Mexico.

Artifacts - Pottery, scrapers (2 were large, circular limestone type), points, etc.

Comments - Surface collection while waiting for the return of Professor R. S. MacNeish from Diablo Canyon.

Site TM-C- 287 March 8, 1954.

Found by P. W. Grant. (Guide Margo Alonzo of Los Angeles)

Location - Up Canyon de Maguey from Los Angeles, Mexico.
about three hours travel by horse and foot.
Cave is on the left hand side in the limestone canyon
~~arroyo~~ wall. About half mile farther down than
Site TM-C- 288

Artifacts - Found ashes of fires, but no artifacts.
A recent fall of rock had covered most of the ledge.

Comments - Cave is about 10 feet wide and 100 feet long,
formed by a rock fall which has made a ledge.
Place is much exposed to wind, sun and rain.

Site TM-C - 288 March 8, 1954.

Found by P. W. G rant. 'Guide Margo. Alonzo of Los Angeles, Mexico)

Location - Up Canyon de Maguey from Los Angeles, Mexico. about three hours travel by horse and foot. Cave is on the right hand side in the limestone ~~arroyo~~ Canyon wall.

Artifacts - Found pottery, bones and teeth (apparently human).

Comments - Many fires have burned on the ledge but it is too exposed for a permanent dwelling place. Deposits of ashes run between one and two feet, but no sign of stratification was seen.

The overhang is about 150 feet long and there has been a fall that has made a ledge about 20 feet wide.

The canyon wall is of very level limestone strata but there are deep deposits of gravel in some places, which have been water cut to form the canyon wall.

Site TM-C- 89 March 10, 1954.

Found by P. W. Grant.

Location - Fields above the village of Los Angeles, Mexico, on the left bank of Arroyo de Maguey.

Artifacts - Bits of pottery, burnt flooring and stone chips scattered over the fields. Pieces of manos and metates also seen, but not collected.

Comments - Very few articles found, considering the ground covered.

Site TM-C- 290 March 9-10, 1954.

Found by P. W. Grant.

Location - Near the village of Los Angeles, Mexico, and stretching from the arroyo crossing to the swimming hole, about a mile to the southeast.
There seems to be two locations. The northwestern end has pottery, while the south eastern end near the swimming hole yielded chipped stone artifacts only.

Artifacts - Pottery, points, scrapers, manos, metates, part of a drill

Comments.
